PETITION FOR USE ON CAMPUSES

TO: (your administration/student union)

WE THE UNDERSIGNED STUDENTS of (insert your information here) support the goals outlined here. These goals have been voiced by student groups and affiliated organizations, and are articulated in a national motion passed in 2005 by the Canadian Federation of Students. They broadly address concerns with beverage exclusivity contracts that limit the opportunity for students and staff to make conscious consumer choices, support local business and public water supplies. In addition, in the majority of cases, these contracts limit students and staff to supporting companies with shady environmental and human rights records internationally.

GOALS:

- We want access to and ability to comment on beverage exclusivity contracts
- We want alternative beverage agreements on campuses that encourage campus/community partnerships
- We want awareness raised on campus of the numerous problems associated with the bottled water trend and the human rights and environmental track records of Pepsi Co and Coca Cola
- We want to challenge the renewal and negotiation of exclusivity contracts on campuses and seek to terminate existing agreements
